

HY-330

fall semester 2024

Introduction to telecommunication systems theory

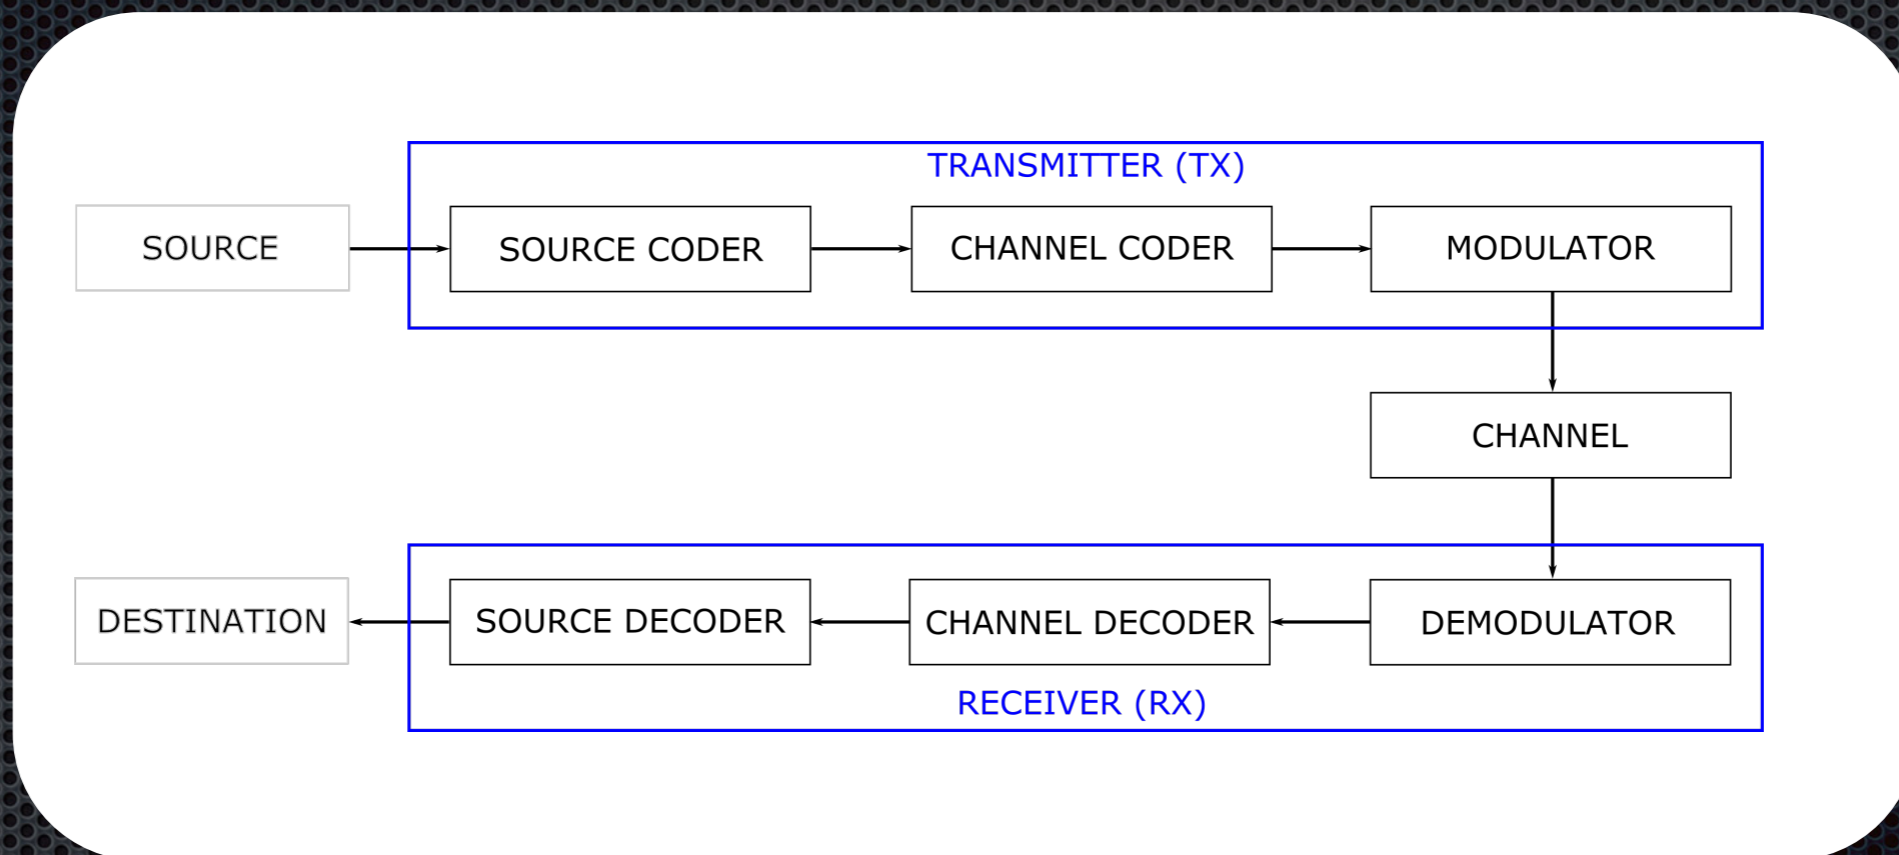

University of Crete
Computer Science Department

Stefanos Papadakis

Rx

- ✦ Synchronization
- ✦ Carrier Frequency Offset
- ✦ Channel Estimation Equalization

Clock Domains

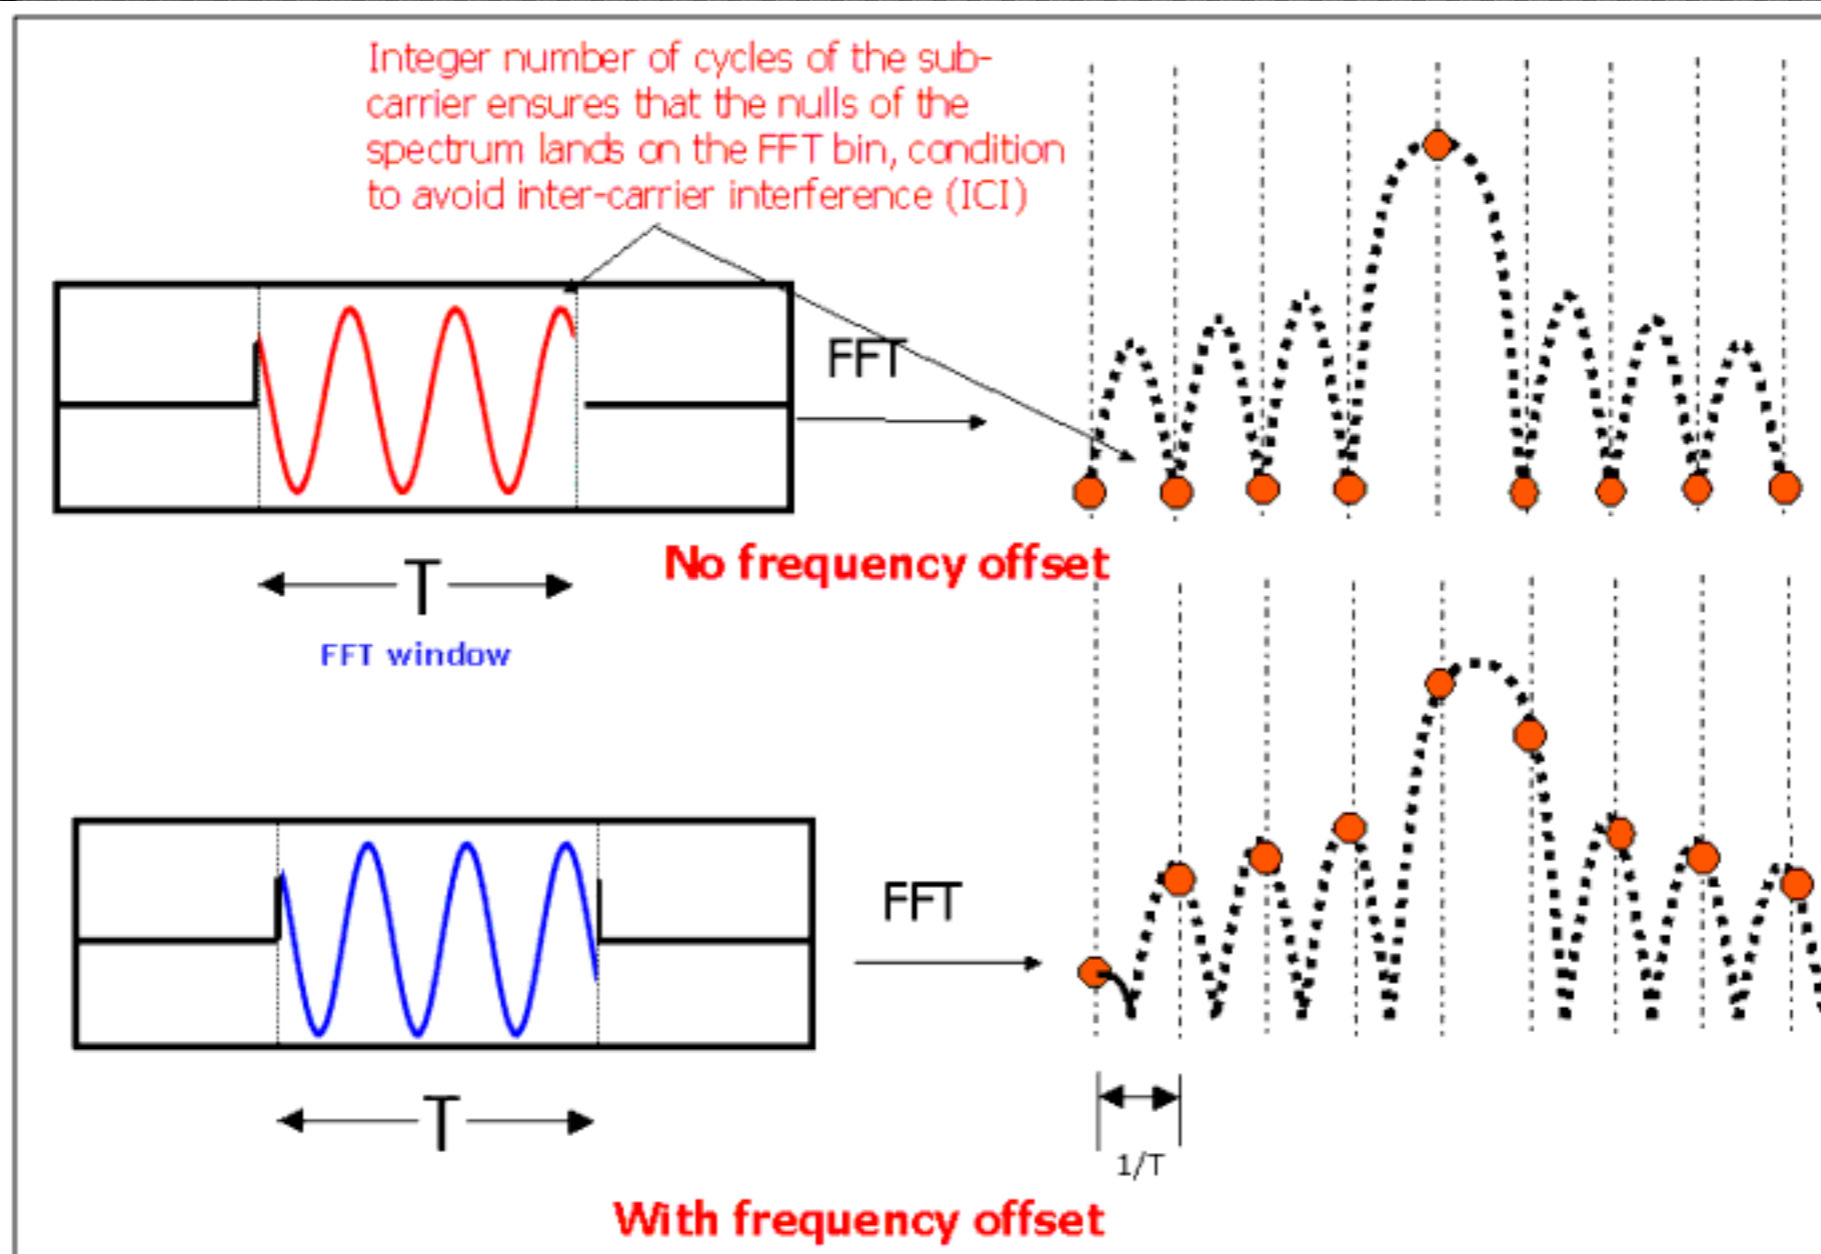

Clocks

- Crystal oscillator (XO)
- Temperature compensated (VCXO)
- Oven controlled (OCXO)
- Rubidium atomic clock
- GPS clock
- Caesium atomic clock
- Hydrogen maser clock

Method	Typical Stability
Crystal oscillator	5 - 50ppm (5×10^{-6})
Temperature compensated crystal oscillator (TCXO)	1ppm (1×10^{-6})
Oven controlled crystal oscillator (OCXO)	0.1ppm (1×10^{-7})
Rubidium oscillator	1×10^{-9}
GPS disciplined oscillator (GPSDO)	1×10^{-11}
Cesium oscillator	10-13
Hydrogen maser (Active)	10-15
